- Testing Techniques: Web App and API Penetration Testing
- Languages/Tech: JavaScript, Python, SQL, PHP
- Reporting & Documentation: Technical writing, risk assessment reports, CVSS scoring

LANGUAGES

- English (Fluent)

PROFILE

I'm a passionate Cybersecurity Engineer with over 3 years of hands-on experience in Penetration Testing, vulnerability assessments, and security auditing. My core strength lies in identifying security loopholes in API and Web applications and delivering strategic remediation plans. I have a strong background in scripting and automation with JavaScript and Python, as well as database and backend-level security using SQL and PHP. I stay up-to-date with the latest threats, techniques, and best practices in cybersecurity, ensuring every system I touch becomes more resilient and secure.

WORK EXPERIENCE

AutoCredit - Monicredit App

REMOTE

Penetration Tester (2023 - Present)

- Conducted extensive vulnerability assessments and security audits.
- Used tools like Burp Suite and POSTMAN to discover and exploit system vulnerabilities.
- Created detailed reports and advised the dev team on hardening solutions.
- Performed black-box and white-box testing on web/mobile platforms.

Marasoftpay

REMOTE

Web Application Penetration Tester (2025 - Present)

- Conducted vulnerability assessments and security audits across ERP and fintech modules.
- Identified multiple critical security issues including HTML Injection, Stored/Reflected XSS, IDOR, Access Control bypass, and Business Logic flaws.
- Delivered professional reports containing PoC, impact analysis, and remediation guidelines.

Motoka

CONTRACT

Web/API Penetration Tester

- Performed penetration testing on web applications.
- Delivered security reports highlighting vulnerabilities and mitigation steps.
- Collaborated with developers and IT teams to ensure security compliance.
- Vulnerabilities discovered include an authentication flaw, Insecure Direct Object Reference (IDOR), Business Logic, and cross-site scripting (XSS).
