PROFESSIONAL SUMMARY

Experienced Software Engineer with 4+ years building scalable web and mobile applications across fintech, healthcare, e-commerce, aviation, and crypto sectors. Proficient in HTML, CSS, JavaScript, Vue.js, React.js, Dart, and Flutter, with a portfolio of 7+ shipped products on the App Store and Google Play. Proven track record of delivering high-quality, production-ready apps through thorough code reviews, automated deployment pipelines, and strong cross-functional collaboration.

WORK EXPERIENCE

Software Engineer | AutoCredit Technology

2021 – Present

- Conduct thorough code reviews to improve code quality, maintainability, and team standards.
- Built and maintained automated CI/CD deployment pipelines, significantly reducing release errors.
- Lead client walkthroughs to verify finished products meet business and functional requirements.
- Designed and implemented responsive web pages that enhanced branding and improved navigation.
- Collaborated cross-functionally with designers, PMs, and engineers to ship production-ready apps.
- Debugged and resolved critical issues including crash reports and user-reported bugs.
- Applied UI/UX design principles to create visually appealing, user-friendly app interfaces.

Frontend Developer | Esocity Ecommerce

2022 – 2023

- Developed responsive e-commerce UI components and product listing pages.
- Integrated frontend interfaces with backend APIs to support dynamic product and cart management.
- Improved page load performance and cross-browser compatibility across the platform.

Mobile Developer | SwiftDrop

2023 – 2024

- Built SwiftDrop, a cross-platform food delivery app using Flutter, featuring restaurant discovery, cart management, and Paystack/wallet payment integration.
- Implemented real-time order tracking UI and push notification workflows.
- Worked closely with backend engineers to design and consume RESTful APIs.

Mobile Engineer (Contract) | Thelix Holdings

Sep 2025 – Dec 2025

- Developed Excel Mind, an LMS (Learning Management System) mobile application, from the ground up using Flutter and Dart.
- Collaborated with other developers to design and implement core LMS features including course browsing, content delivery, and user progress tracking.
- Delivered the full mobile app within a focused contract engagement, covering UI implementation, API integration, and testing.

- Teach web and mobile development fundamentals to aspiring developers.
- Design curriculum covering HTML, CSS, JavaScript, and Flutter for beginner-to-intermediate students.
- Mentor students on real-world projects and best practices in software development.

PROJECTS

Monicredit *[Flutter, Dart, Paystack, QR, Biometrics]*

A full-featured digital banking app similar to Kuda and OPay, built on a wallet-based system. Features include internal and external transfers, payment requests, QR code payments, biometric authentication, airtime purchase, and electricity bill payments.

Personal Project

Genescor *[Flutter, Dart, Firebase]*

An innovative health app providing convenient online medical consultations for sickle cell patients, eliminating long hospital queues. Supports both doctor and patient role-based access with appointment and consultation workflows.

Available on Google Play Store

Bizza *[Flutter, Dart, Crypto APIs]*

A powerful yet beginner-friendly crypto wallet app for secure digital asset management. Allows users to store, send, and receive multiple crypto assets in one unified interface.

Available on App Store & Google Play Store

AvvA – Aviation Virtual Assistant *[Flutter, Dart, Firebase, Email Automation]*

An aviation-focused assistant app combining travel intelligence, task and briefing workflows, and role-based access for clients and wingmates. Supports trip management, location automation, and email-based task workflows.

Available on App Store

Mariner *[Flutter, Dart, Maps API]*

A boater-focused mobile app covering navigation, a built-in marketplace, in-app messaging, user profiles, and real-time safety and weather information for marine environments.

Available on Google Play Store

Dashndrop *[Flutter, Dart, Paystack]*

A two-sided food delivery e-commerce app serving both vendors and end users. Customers can browse nearby restaurants, add items to cart, and pay via wallet or Paystack. Vendors manage listings and orders through a dedicated interface.

Personal Project

QuickVtu *[Flutter, Dart, Fintech APIs]*

A fintech Virtual Top-Up application focused on airtime recharge and bills payment. Provided users with a fast, reliable platform for managing utility and telecom payments. (Discontinued)

Was available on Google Play Store
